Examiner's Statement and Reasons for Allowance

Examiner's Statement

Applicant's amendment to the claims filed on 9/9/10 is acknowledged and has been entered.

The rejection of claims 66-71 and 125-128 under 35 USC 112, first paragraph set forth in the previous Office action is withdrawn in view of applicant's arguments filed 9/9/10, which is found persuasive.

Claims 66-71 and 125-128 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a library comprising a plurality of polynucleotides, each polynucleotide of the library comprising a vector and an insert, wherein each of the insert sequences consist essentially of accessible regions of cellular chromatin, wherein there are at least two different insert sequences and further wherein the library is obtained according to the method of:

(a) contacting cellular chromatin with a probe, wherein reaction of the probe with cellular chromatin results in polynucleotide cleavage at accessible regions of cellular chromatin;

(b) deproteinizing the cleaved chromatin of step (a);

(c) digesting the deproteinized chromatin of step (b) with a nuclease to generate a collection of polynucleotide fragments; and

Art Unit: 1631

(d) selectively cloning polynucleotide fragments comprising one end generated by probe cleavage.

The closest prior art is Clontech (Clontech Catalog, 1998-1999, pages 177-183, Clontech Laboratories, Inc., Palo Alto, California) in view of Grosveld et al. (US Patent 5,635,355), as cited in the rejection mailed 12/8/09. However, the combination of the prior art references does not teach a library as claimed that comprises at least two different insert sequences.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
